Mike Kehoe
GOVERNOR
STATE OF MISSOURI

Dear Aviator:

Welcome to Missouri from the Governor's Office!

As Governor of the State of Missouri, I am delighted to welcome you and provide you with the 2026-2027 Missouri Airport Directory. I hope you find information throughout these pages to assist you with your travels.

Airports are essential to our state's infrastructure. Not only do they provide a safe travel option for both people and cargo across the state, they also help propel economic development. Airports also provide the opportunity for Missouri businesses to supply markets throughout the nation and the world.

From both the air and the ground, the views in Missouri are breathtaking. If given the opportunity, please take the chance to experience our beautiful landscapes, rich culture and abundant recreational activities.

I sincerely hope you enjoy your visit to our great state and extend best wishes for safe travels and enjoyable flights!

Sincerely,

Michael Kehoe

Mike Kehoe
Governor

CAUTION

To the users of this Directory:

The purpose of this publication is to provide general information for VFR flying that may be useful to a pilot in planning a flight or in communicating with a particular airport. It is not intended to be relied upon as a completely accurate depiction of existing airport conditions.

Everyone involved in the production of this document has strived to ensure that the information contained herein is accurate. However, it is always possible that errors have been made. Also, conditions at an airport can change at any time. Accordingly, the user is cautioned against using this publication as a sole source for obtaining Missouri airport information. The user should obtain the latest information from all available sources prior to flight. Such sources include, but are not limited to, the Aeronautical Information Manual, the current Federal Aviation Administration (FAA) Chart Supplement, and FAA's Notices to Air Missions (NOTAMS). Telephone numbers of the airport owners, managers, and operators, have also been included for your use.

Remember, the pilot in command is responsible for the safety of the flight. That includes obtaining the most accurate information available. This Directory alone will not fulfill that obligation!

Navigate the 2025-2026 Missouri Airport Directory and Travel Guide online and also view the latest airport information updates!

DO NOT REPORT AIRCRAFT ACCIDENTS AND CRIMINAL ACTIVITIES ON THIS FORM.

ACCIDENTS AND CRIMINAL ACTIVITIES ARE NOT INCLUDED IN THE ASRS PROGRAM AND SHOULD NOT BE SUBMITTED TO NASA.
ALL IDENTITIES CONTAINED IN THIS REPORT WILL BE REMOVED TO ASSURE COMPLETE REPORTER ANONYMITY.

(SPACE BELOW RESERVED FOR ASRS DATE/TIME STAMP)

IDENTIFICATION STRIP: Please fill in all blanks to ensure return of strip.
NO RECORD WILL BE KEPT OF YOUR IDENTITY. This section will be returned to you.

NASA ARC 277B (May 2009)

GENERAL FORM

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

NASA has established an Aviation Safety Reporting System (ASRS) to identify issues in the aviation system which need to be addressed. The program of which this system is a part is described in detail in FAA Advisory Circular 00-46E and FAA Handbook 7210.3. Your assistance in informing us about such issues is essential to the success of the program. Please fill out this form as completely as possible, enclose in a sealed envelope, affix proper postage, and send it directly to us.

The information you provide on the identity strip will be used only if NASA determines that it is necessary to contact you for further information. THIS IDENTITY STRIP WILL BE RETURNED DIRECTLY TO YOU. The return of the identity strip assures your anonymity.

AVIATION SAFETY REPORTING SYSTEM

Section 91.25 of the Federal Aviation Regulations (14 CFR 91.25) prohibits reports filed with NASA from being used for FAA enforcement purposes. This report will not be made available to the FAA for civil penalty or certificate actions for violations of the Federal Air Regulations. Your identity strip, stamped by NASA, is proof that you have submitted a report to the Aviation Safety Reporting System. We can only return the strip to you, however, if you have provided a mailing address. Equally important, we can often obtain additional useful information if our safety analysts can talk with you directly by telephone. For this reason, we have requested telephone numbers where we may reach you.

Thank you for your contribution to aviation safety.

NOTE: AIRCRAFT ACCIDENTS SHOULD NOT BE REPORTED ON THIS FORM. SUCH EVENTS SHOULD BE FILED WITH THE NATIONAL TRANSPORTATION SAFETY BOARD AS REQUIRED BY NTSB Regulation 830.5 (49CFR830.5).

If you want to mail this form, please fold both pages (and additional pages if required), enclose in a sealed, stamped envelope, and mail to:

NASA AVIATION SAFETY REPORTING SYSTEM
POST OFFICE BOX 189
MOFFETT FIELD, CALIFORNIA 94035-0189

DESCRIBE EVENT/SITUATION

Keeping in mind the topics shown below, discuss those which you feel are relevant and anything else you think is important. Include what you believe really caused the problem, and what can be done to prevent a recurrence, or correct the situation. (USE ADDITIONAL PAPER IF NEEDED)

Page 2 of 3

CHAIN OF EVENTS

- How the problem arose
- Contributing factors
- How it was discovered
- Corrective actions

HUMAN PERFORMANCE CONSIDERATIONS

- Perceptions, judgments, decisions
- Actions or inactions
- Factors affecting the quality of human performance

Airspace Classes

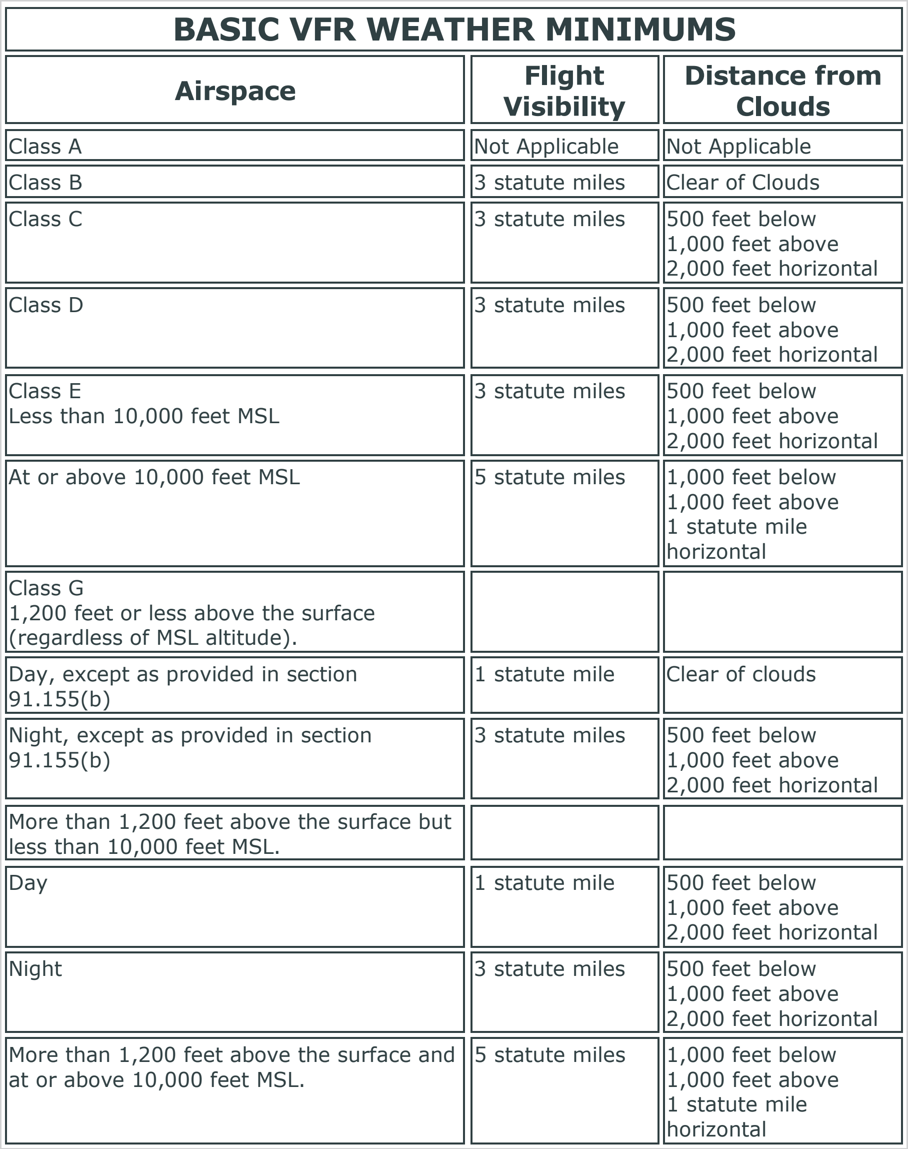
CLASS G
CLASS G
CLASS G

MSL - mean sea level
AGL - above ground level
FL - flight level



BASIC VFR WEATHER MINIMUMS

Airspace	Flight Visibility	Distance from Clouds
Class A	Not Applicable	Not Applicable
Class B	3 statute miles	Clear of Clouds
Class C	3 statute miles	500 feet below 1,000 feet above 2,000 feet horizontal
Class D	3 statute miles	500 feet below 1,000 feet above 2,000 feet horizontal
Class E Less than 10,000 feet MSL	3 statute miles	500 feet below 1,000 feet above 2,000 feet horizontal
At or above 10,000 feet MSL	5 statute miles	1,000 feet below 1,000 feet above 1 statute mile horizontal
Class G 1,200 feet or less above the surface (regardless of MSL altitude).		
Day, except as provided in section 91.155(b)	1 statute mile	Clear of clouds
Night, except as provided in section 91.155(b)	3 statute miles	500 feet below 1,000 feet above 2,000 feet horizontal
More than 1,200 feet above the surface but less than 10,000 feet MSL.		
Day	1 statute mile	500 feet below 1,000 feet above 2,000 feet horizontal
Night	3 statute miles	500 feet below 1,000 feet above 2,000 feet horizontal
More than 1,200 feet above the surface and at or above 10,000 feet MSL.	5 statute miles	1,000 feet below 1,000 feet above 1 statute mile horizontal

TEMPORARY FLIGHT RESTRICTIONS

Temporary Flight Restrictions (TFR) are tools used by the Federal Aviation Administration (FAA) to restrict aircraft operations within designated areas. TFR's are used by air traffic management as a means of separating "non-participating" aircraft from those engaged in certain activities, such as firefighting, rescue, and law enforcement operations. They are also used to keep aircraft away from surface-based hazards that could impact safety of flight. Due to regulatory changes and issues with national security, TFRs, along with Air Defense Identification Zones (ADIZ) and Flight Restriction Zones (RFZ), have been widely and increasingly used to restrict over-flights through certain airspace.

While TFRs may be triggered by different events, it is important that pilots familiarize themselves with each type of restriction, and how it may impact a pilot's proposed flight. Of equal importance, pilots must know how best to gain information concerning TFRs before each flight. Inadvertent flight into a TFR not only places a pilot's certificate at risk, it also increases the chances of being intercepted by military or law enforcement aircraft. Straying into TFR airspace may also increase the risk of a mid-air collision.

Interception signals and procedures are outlined in the Interception Signals chart included in this Directory. For further information on TFRs, you may visit FAA's website at www.faa.gov.

INTERCEPTING SIGNALS

Signals initiated by intercepting aircraft and responses by intercepted aircraft (as set forth in ICAO Annex 2-Appendix A, 2.1)

Series	Intercepting Aircraft Signals	Meaning	Intercepted Aircraft Responds	Meaning
1	**Day** - Rocking wings from a position slightly above and ahead of, and normally to the left of, the intercepted aircraft and, after acknowledgement, a slow level turn, normally to the left, on to the desired heading. **Night** - Same and, in addition, flashing navigational lights at irregular intervals. **Note 1** - Meteorological conditions or terrain may require the intercepting aircraft to take up a position slightly above and ahead of, and to the right of, the intercepted aircraft and to make the subsequent turn to the right. **Note 2 -** If the intercept aircraft is not able to keep pace with the intercepting aircraft, the latter is expected to fly a series of race-track patterns and to rock its wings each time it passes the intercepted aircraft.	You have been intercepted! Follow me.	**Aeroplanes:** **Day** - Rocking wings and following. **Night** - Same and, in addition, flashing navigational lights at irregular intervals. **Helicopters:** Day or Night Rocking aircraft, flashing navigational lights at irregular intervals and following.	Understood, will comply.
2	**Day or Night** - An abrupt break-away maneuver from the intercepted aircraft consisting of a climbing turn of 90 degrees or more without crossing the ling of flight of the intercepted aircraft	You may proceed.	**Aeroplanes:** Day or Night - Rocking wings. **Helicopters:** Day or Night - Rocking aircraft.	Understood, will comply.
3	**Day** - Circling aerodrome, lowering landing gear and over-flying runway in direction of landing or, if the intercepted aircraft is a helicopter, over-flying the helicopter landing area. **Night** - Same and, in addition, showing steady landing lights.	Land at this aerodrome.	**Aeroplanes:** Day - Lowering landing gear, following the intercepting aircraft and, if after over-flying the runway landing is considered safe, proceed to land. Night-Same and, in addition, showing steady lights (if carried). **Helicopters:** Day or Night - Follow the intercepting aircraft and proceed to land, showing a steady landing light (if carried).	Understood, will comply.
4	**Day or Night** - Raising landing gear (if fitted) and flashing landing lights while passing over runway in use or helicopter landing area at a height exceeding 1,000 ft but not exceeding 2,000 ft (in the case of helicopter, at a height exceeding 170 ft, but not exceeding 330 ft) above the aerodrome level, and continuing to circle runway in use or helicopter landing area. If unable to flash landing lights, flash any other lights available.	Aerodrome you have designated is inadequate.	**Day or Night** - If it is desired that the intercepted aircraft follow the intercepting aircraft to an alternate aerodrome, the intercepting aircraft raises its landing gear (if fitted) and uses the Series 1 signals prescribed for intercepting aircraft. If it is decided to release the intercepted aircraft, the intercepting aircraft uses the Series 2 signals prescribed for intercepting aircraft.	Understood, follow me. Understood, you may proceed.
5	**Day or Night** - Regular switching on and off of all available lights but in such a manner as to be distinct from flashing lights.	Cannot comply.	**Day or Night** - Use Series 2 signals prescribed for intercepting aircraft.	Understood
6	**Day or Night** - Irregular flashing of all available lights.	In distress.	**Day or Night** - Use Series 2 signals prescribed for intercepting aircraft.	Understood

CIVIL AIRCRAFT PILOTS. FAR Part 91 requires you file an IFR flight plan to operate under instrument flight rules in controlled airspace. Failure to file could result in a civil penalty not to exceed $1,000 for each violation (Section 901 of the Federal Aviation Act of 1958, as amended). Filing of a VFR flight plan is recommended as a good operating practice. See also Part 99 for requirements concerning DVFR flight plans.

		Transponder with Mode C	/G

Starting January 1, 2020, you must be equipped with **ADS-B Out** to fly in most controlled airspace!

If you fly in this airspace you must be equipped with ADS-B	
Airspace	**Altitude**
Class A	All
Class B	Generally, from surface to 10,000 feet mean sea level (MSL) including the airspace from portions of Class Bravo that extend beyond the Mode C Veil up to 10,000 feet MSL (e.g. SEA, CLE, PHX)
Class C	Generally, from surface up to 4,000 feet MSL including the airspace above the horizontal boundary up to 10,000 feet MSL
Class E	Above 10,000 feet MSL over the 48 states and DC, excluding airspace at and below 2,500 feet AGL
	Over the Gulf of Mexico at and above 3,000 feet MSL within 12 nautical miles of the coastline of the United States
Mode C Veil	Airspace within a 30 NM radius of any airport listed in Appendix D, Section 1 of Part 91 (e.g. SEA, CLE, PHX) from the surface up to 10,000 feet MSL

Any airspace that requires the use of a Transponder today will on January 01, 2020 also require aircraft to be equipped with a Version 2 ADS-B Out system. This can be either a 1090ES (DO-260B) ADS-B system or a UAT (DO-282B) ADS-B system.
